

Immigration And International Relations: Proceedings Of A Conference On The International Effects Of

Moving Beyond Comprehensive Immigration Reform and Trump: Principles, Interests, and Policies to Guide Long-Term Reform of the US Immigration System

Donald Kerwin
Center for Migration Studies

Executive Summary

This paper introduces a special collection of 15 papers that chart a course for long-term reform of the US immigration system. The papers look beyond recent legislative debates and the current era of rising nationalism and restrictionism to outline the elements of a forward-looking immigration policy that would serve the nation's interests, honor its liberal democratic ideals, promote the full participation of immigrants in the nation's life, and exploit the opportunities offered by the increasingly interdependent world. This paper highlights several overarching themes from the collection, as well as dozens of proposals for reform. Together, the papers in the collection make the case that:

- Immigration policymaking should be embedded in a larger set of partnerships, processes, and commitments that respond to the conditions that force persons to migrate.
- The US immigration system should reflect liberal democratic values and an inclusive vision of national identity.
- It is incumbent on policy and opinion makers to publicize the broad national interests served by US immigration policies.
- Policymakers should, in turn, evaluate and adjust US immigration policies based on their success in furthering the nation's interests.
- The United States should prioritize the gathering and dissemination of the best available evidence on migration and on the nation's migration-related needs and programs, and should use this information to respond flexibly to changing migration patterns and new economic developments.
- Immigrant integration strengthens communities and represents an important, overarching metric for US immigration policies.
